Re: Genetically Engineered Plants and Seeds

2130 '99 AUG -3 19:56

We the undersigned are deeply concerned about the engineering technology of seed developed by corporations such as Monsanto, Novartis and Pioneer Hi-Bred.

We insist:

- 1) that there be further, *impartial* testing of these plants and their impact on humans and the environment before these products are sold on the market;
- 2) that products incorporating genetically engineered foods be labeled; and
- 3) that proper public discussion is held before these technologies (and their unforeseen, possibly destructive, problems) are exported.
